

Motor Oil *Made In JAPAN*

Blended Japanese traditional craft & high-technology.

MOTOR OIL MADE IN JAPAN

"Motor Oil Developed for the World, Accepted by the World"

TAKUMI MOTOR OIL, which was sold in 21 countries including Japan till 2015, is a motor oil brand noted for being "genuine Made in Japan" and "developed for the world". TAKUMI is proud of the advanced product development capability and various product lineups in order to meet the standards or specifications all over the world. Its excellent quality enhances engine performance of every car in the world; not only Japanese cars, but also non-Japanese cars such as European, American, and Korean. Our products satisfy all needs from racing cars to passenger cars for everyday use.

Blending Japanese Traditional Craftsmanship & High Technology.

In order to achieve our simple and clear goal of offering "Genuine MADE IN JAPAN quality at a reasonable price to people all over the world", TAKUMI (TAKUMI means "skilled craftsman" in Japanese) developed excellent-quality motor oil at a production plant with cutting-edge facilities established for producing motor oil effectively and automatically, As a result of these efforts, we have succeeded in creating a highly efficient production process; plan/development/production/delivery, that allows us to offer our products at a reasonable price.

X-TREME Series

Highly Regarded by Top Racing Teams. High Performance Motor Oil for Tuning Cars and Racing Use

5 products of X-treme series, 0W-40, 5W-50, 20W-50, 25W-60 based 100% Synthetic oil (PAO+ESTER) and 10W-60 blending new generation base oil called HIVI with PAO, have relentlessly pursued the highest quality as the flag ship line of TAKUMI MOTOR OIL. Our products enhance stable oil pressure in harsh environments with heat or hyperbaric for long periods of time, so that this quality is highly regarded by a car racing team challenging "SUPER GT 300 CLASS CARS", the top category race in Japan. X-treme series is most suitable for sports cars and high output cars.

Lineup	0W-40 SN	5W-50 SM/CF	10W-60 SM/CF	20W-50 SN	25W-60 SN
Packing	20L/4L/1L	(Only 20L can is available for 20W-50 & 25W-60)			

HYBRID Series

Improving fuel efficiency for hybrid cars and the latest Japanese cars

HYBRID series, which has soft viscosity, is suitable for HYBRID cars and the newest Japanese cars with small piston clearance by reducing frictional resistance between the engines' moving parts and piston ring's contact surface. Our products help fuel-saving, and enhance starting performance. 0W-20 is for short distance and 0W-30 is for long distance. (More than two hours, or more than 100Km of traveling at one time).

Lineup	0W-20 SN+GF5	0W-30 SN+GF-5
Packing	200L / 20L / 4L / 1L	

HIGH QUALITY Series

Achieved both High Quality and Good Cost Performance (Low Prices)

HIGH QUALITY series is the core of TAKUMI MOTOR OIL, 5 lineups are available for all types of vehicles all over the world. This series has excellent basic performance such as lubricity, engine starting performance, heat resistance, wear resistance, as well as especially clean dispensability. Its excellent quality makes oil change intervals much longer. (Approximately 10,000km and over) This series provides our customer "high quality at low prices" which is the main concept of TAKUMI MOTOR OIL.

Lineup	5W-20 SN+GF-5	5W-30 SN/GF-5	5W-40 SM/CF	10W-30 SN/CF	10W-40 SN/CF
Packing	200L / 20L / 4L / 1L				

STANDARD Series

Long Life Motor Oil for General Purpose Particularly for Older Cars

STANDARD series, based high quality mineral oil, offers high performance at a low price. (HIVI is blended in 5W-30, the high-demanded products) As this series has excellent stable viscosity and prevents degradation (Antioxidant performance) in spite of the reasonable price, it can be used general purpose. Its little-harder viscosity is the most suitable for motor engines manufactured before 2003.

Lineup	5W-30 SL+GF-3	10W-30 SL/CF	10W-40 SL/CF
Packing	200L / 20L / 4L / 1L		

MULTI GEAR Series

Satisfied the API GL-5 Performance Standards Required by Major Car Manufacturers

MULTI GEAR series boasts high lubricity, and also maintains good performance under harsh environments such as low-torque at high temperature, high-torque in slow speed or continuous impact load. 75W-140 and 85W-140 are especially lined up for mechanical LSD used for racing cars.

Lineup	75W-90 GL-5	80W-90 GL-5	75W-140 ※20L only	85W-140 ※20L only
Packing	200L / 20L / 4L / 1L			

ATF D-III/MV

DEXIII/JASO 1A certificated. Enhance High Accelerating and Fuel-Saving

ATF D-III/MV is suitable for AT(Automatic Transmission) due to its viscosity originated from synthesized oil called HIVI. Specifically, ATF D-III/MV enables the stable torque transmission from low to high temperature range because of its excellent friction property in a torque converter which is very important for AT. Accelerating and fuel-saving are enhanced by effective power transmission from engine to wheels. ATF D-III/MV also reduces the shift shock while driving long distances.

Packing	200L / 20L / 4L / 1L
---------	----------------------

CVT TECH

Dramatically Reducing the Shift Shock and Smooth Acceleration

CVT TECH enhances the stability of the oil film over long periods and performs high-seizure resistance as HIVI is used as the base oil. TAKUMI original oil additive reduces the shift shock under high-heat load condition, and performs smooth acceleration in all range of speed.

Packing	200L / 20L / 4L / 1L

DIESEL OIL Series

DIESEL OIL enhancing low-fuel consumption and long-lasting high performance

TAKUMI DIESEL OIL series has various types of products; the main product, "DPF CLEAR", is for buses and trucks equipped with the newest environmental protection device called Diesel Particulate Filter (DPF). The multi grade oil for general use and the single grade oil focusing on fuel-economy are also available. TAKUMI DIESEL OIL series enhances for low fuel consumption and long-lasting high performance.

Lineup	〈 DPF CLEAR 〉 10W-30 DH-2/CF-4	〈 MULTI DIESEL 〉 10W-30 CF	15W-40 CF	and more.
Packing	200L / 20L
